

# DOCTOR, DOCTOR... WHAT'S WRONG WITH MY PUMP?

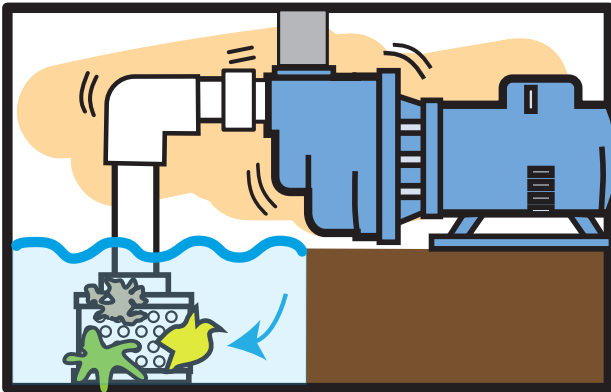

## Understanding Causes & Consequences of **RUN-DRY**

**SYMPTOMS:** The pump runs but does not deliver water. Hot motor, inconsistent water flow or surges, and/or water puddles under the pump.

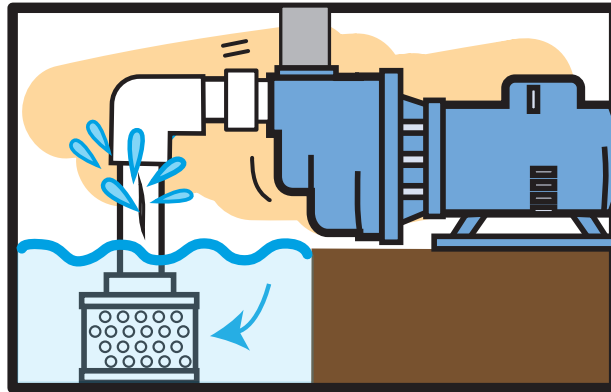

**CONSEQUENCES:** In just a few minutes of operation without water, the pump will burn up seals and/or the motor, resulting in permanent damage and requiring pump replacement.

## CAUSES OF RUN-DRY:

### 1 CLOGGED SUCTION

### 2 LOSS OF PRIME DUE TO AIR OR WATER LEAK

### 3 WATER SOURCE IS EMPTY
